Aptose Biosciences Announces Update on Anticipated Timing of Closing of the Plan of Arrangement with Hanmi Pharmaceutical

SAN DIEGO and TORONTO, May 29, 2026 (GLOBE NEWSWIRE) -- Aptose Biosciences Inc. (“Aptose” or the “Company”) (TSX: APS; OTC: APTOF) announced today that closing of the previously announced arrangement (the “Arrangement”) with Hanmi Pharmaceutical Co. Ltd. (“Hanmi”) and HS North America Ltd., a wholly owned subsidiary of Hanmi (“Hanmi Purchaser” and together with Hanmi, the “Hanmi Purchasers”), has been further delayed as certain Korean regulatory approvals pertaining to the Arrangement remain in progress. The parties do not anticipate that the review will prevent closing and continue to work toward completing the Arrangement that they now target for the month of June. The Company will provide a further update when available.

As previously disclosed in the Company’s news release dated November 19, 2025 (here), upon the completion of the Arrangement, Hanmi will acquire all of the issued and outstanding common shares of Aptose (“Common Shares”) that are not currently owned or controlled by the Hanmi Purchasers or their respective affiliates and shareholders of Aptose, other than the Hanmi Purchasers and their respective affiliates that hold any Common Shares, will receive C\$2.41 in cash per Common Share, which represents a premium of 28% over Aptose’s 30-day VWAP of C\$1.88 on the Toronto Stock Exchange for the period immediately preceding entering into the Arrangement Agreement.

The Company also announced that it has received an additional advance of US\$2.0 million from Hanmi as part of a US\$11.9 million loan amended facility agreement (“Facility Agreement”) announced prior on September 22, 2025 (here). To date, Aptose has received an aggregate of US\$9.9 million under the Facility Agreement. Aptose expects to receive the final advance of US\$2.0 million under the Facility Agreement in the coming days. These advances support Aptose and enable uninterrupted continuance of the TUSCANY clinical trial with tuspentinib in combination with venetoclax and azacitidine for the frontline treatment of newly diagnosed AML.
